HAYAT FAHAD ISMAIL

Full Stack Developer

📞 +918320295586 @ cyberfahad72@gmail.com 🔗 https://portfolio25-two-lilac.vercel.app/ 📍 Godhra, Gujarat , India

SUMMARY

Full-stack engineer working with MERN, Flask, MySQL, and REST API design. Built end-to-end systems involving authentication, database integrations, and real-time data handling. Developed a grocery-ordering platform with an image-based receipt flow and automated request routing using EmailJS. Created TrapMind AI, a security-focused system with backend automation and a cloud-ready architecture. Completed multiple project builds and participated in four hackathons, including a Top-3 finish. Interests include e-commerce platforms, application security, and cloud-native development.

EXPERIENCE

Senior Full stack Developer
FUELFLUX
📅 05/2025 - 09/2025 📍 Vadodara, India

- Built both the User and Admin web platforms using MERN.js .
- Designed the complete fuel pre-ordering workflow, including authentication, order management, and admin-level controls.
- Implemented database models, secure API routes, and role-based access.
- Developed a responsive frontend with React and integrated real-time updates for admin operations.

Intern
Rapido
📅 11/2024 - 05/2025 📍 Vadodara, India

- Contributed to internal web tools and feature improvements..
- Worked on frontend fixes, API integrations, and basic backend tasks.
- Gained exposure to production workflows, deployment cycles, and high-load environments.
- Learned to deliver tasks under time constraints and maintain clean, functional code.

Freelance Web Developer
**Freelance projet**
📅 05/2025 - 08/2025 📍 Vadodara, India

- Delivered multiple client projects, including work for Parul University's Psychology Department.
- Built custom web applications with React, Flask, MongoDB/MySQL, and REST APIs.
- Implemented admin dashboards, form systems, and automated email processes.
- Managed hosting, deployment, and maintenance for client projects.

SKILLS

Client-Side

| HTML | CSS | JS | React |

| TypeScript | Bootstrap |

Server-Side

| Python | NumPy | SciPy | Keras |

| TensorFlow | MySQL | NodeJS |

| Redis | AWS | MongoDB |

Development & Operations

| PyUnit | GIT | Azure DevOps |

EDUCATION

Information & Technology
Parul University
📅 2023 - 2027 📍 Vadodara, India

GPA
7.23 / 10.0

PROJECTS

Trapmind AI
📅 10/2024 - 12/2025 📍 Godhra, India

Tech: Python, Flask, AI modules, Cloud

- Developed a security-focused application with backend automation.
- Designed a modular architecture for adaptive behavior and future expansion.
